

STAL - West Zrt.

THE SYSTEM SUPPLIER

INTRODUCING **STAL-WEST ZRT.**

In the metal industry, reliability and precision are the key – and that's exactly what we deliver. With decades of experience, state-of-the-art technology, and dedicated expertise, STAL-West Zrt. serves its partners with excellence.

Aluminum and steel product manufacturing, surface treatment, engineering services, and custom solutions – all in one place.

ABOUT US

STAL-West Zrt. is a family-owned mid-sized enterprise located 80 km from Budapest.

Our core business focuses on aluminum sheet and profile processing, as well as steel sheet fabrication—delivering everything from raw material to painted, assembled, and finished products, welded structures, and roof and floor doors.

Our technical expertise enables us to manufacture both custom and series-produced products with different structural designs, from development to execution.

Additionally, we offer significant surface treatment services (anodizing) for both steel and aluminum products. We also provide the innovative VIANT coating technology, which effectively eliminates the shortcomings of KTL coatings.

- Number of employees: 70 (56 in production)
- Factory building area: 7,287 m²
- Industrial site area: 33,184 m²

STEEL & ALUMINIUM - WELDED STRUCTURES

OUR CAPABILITIES

SURFACE TREATMENT

- Surface pre-treatment
- Nature Anodizing (E6/CO)
- Powder coating
- VIANT primer technology (Replacing KTL)

PROFIL & SHEET METAL PROCESSING

- CNC laser cutting
- CNC punching
- CNC bending
- Double disc cutting
- Bandsaw cutting

OUR CAPABILITIES

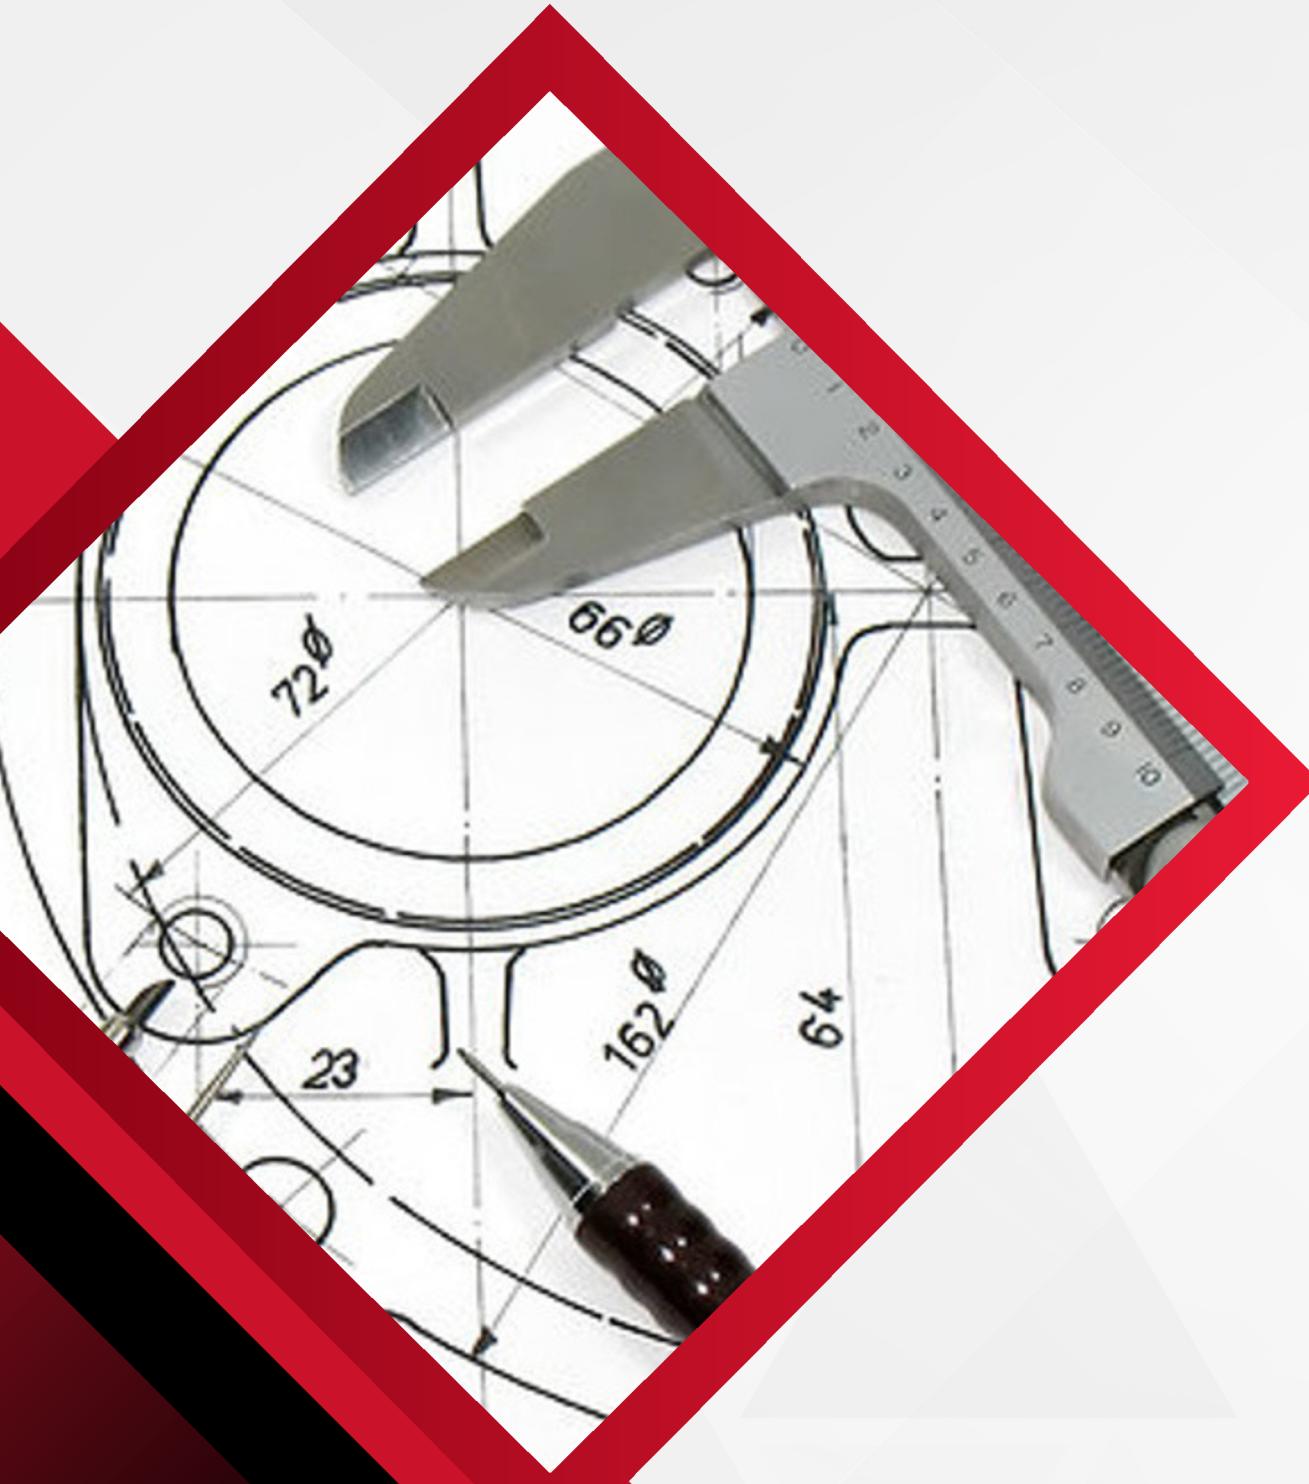

WELDING

- TIG, MIG-MAG, stud welding
- Robotic welding (Yaskawa – steel)
- Super Active aluminum welding (Panasonic)
- Laser welding (aluminium & steel)
- Stud welding

ASSEMBLY

ENGINEERING SERVICES

- Examination of development opportunities after the start of series production
- Product development from the prototype phase to mass production
- Finite element analysis (FEA)
- Reverse engineering

STAL-WEST ZRT.

VISION OF THE FUTURE

Our aim is to become a leading player in engineering solutions and technical innovation, with a special focus on manufacturability-optimized product development and the design of high-tech structures.

Our key aspirations include:

- Implementing cutting-edge engineering solutions, with a strong emphasis on digital prototyping, simulations, and production optimization.
- Developing sustainable and cost-effective designs that reduce raw material consumption and optimize manufacturing processes.
- Strengthening customer collaboration to build long-term partnerships and tackle engineering challenges together.
- Expanding our presence in international markets to serve key industry players across Europe and beyond with our engineering services and products.

In the future, STAL-West Zrt. will remain committed to innovation, quality, and customer focus, continuously setting new benchmarks in the industry with its engineering expertise.

MISSION STATEMENT

Our goal is to leverage our knowledge and capabilities to provide innovative services that ensure continuous growth for our customers. By doing so, we enhance their satisfaction and give them a long-term competitive market advantage.

Our Mission

- Customer-Centric Development – We always keep our customers' needs in focus, striving to ensure that our services fully meet their expectations.
- Cost Optimization – Through continuous analysis and refinement of our manufacturing processes, we keep production costs competitive, allowing us to offer favorable pricing to our customers.
- Flexibility – We are committed to continuously improving our delivery and service flexibility to better meet customer demands.
- Innovation – We constantly seek and apply new solutions to support our customers' success through our developments.
- Customer Satisfaction – We closely monitor and evaluate customer feedback to maintain the highest level of service quality.

CONTACT

For inquiries and quote requests, we offer our customers the opportunity to contact us directly. Please feel free to reach out to **Zoltán Hugyecz, CEO**, via any of the following contact details:
